

Media release, July 23, 2019

## InnoDrive is the new distributor in Russia

**Drive specialist maxon will be represented in Russia by the distribution partner InnoDrive starting this summer. Customers will continue to receive the precise maxon drive systems and services directly and locally.**

InnoDrive started as the official distributor of maxon products in Russia on 01 June 2019. This gives local customers a new contact to supply them with the comprehensive maxon product portfolio, provide competent supports, and help them find the perfect drive solution for their application.

maxon has been represented in Russia with drive systems for several years and is confident to start a stable long-term partnership with InnoDrive.

### **The Swiss specialist for quality drives**

maxon is a developer and manufacturer of brushed and brushless DC motors, as well as gearheads, encoders, controllers, and entire mechatronic systems. maxon drives are used wherever the requirements are particularly high: in NASA's Mars rovers, in surgical power tools, in humanoid robots, and in precision industrial applications, for example. To maintain its leadership in this demanding market, the company invests a considerable share of its annual revenue in research and development. Worldwide, maxon has more than 3000 employees at nine production sites and is represented by sales companies in more than 30 countries.
