¹ The length shown here refers to the encoder. An additional intermediate plate is required for motor mounting. For more detailed information, see the combined dimensional drawing.

EC motors: The angle value 0 is calibrated to the commutation phase of coil 1 (equates to Hall signal 1 for motors with Hall sensors, block commutation), see p. 64.

Ordering information: For motors that cannot be configured online, the part numbers **711113** (BiSS-C) and **711112** (SSI) must be used when ordering.
